COMP 304: Project 2

t Seconds of Fame

We used CMake to build our project. Follow these steps to build and run the code:

1. Extract the code
2. Move into the folder
3. Run the following commands to build:

```
mkdir build
```

```
cd build
```

```
cmake ..
```

```
make
```

4. Run the executable in the build folder with parameters:

```
./main -n 4 -p 0.75 -q 5 -t 3 -b 0.05
```

We implemented all the parts in the project as required and the project runs successfully.
